

HOIST FKS-SERIES

POWER SOLUTION FOR ANY HEAVY-DUTY MILL APPLICATION

The Hoist FKS-Series (FKS15 | FKS20) delivers the power you need to meet any steel mill or heavy-duty indoor application. With a powerful Cummins diesel engine, it meets mill duty challenges up to 40,000 lbs. with the intelligent operation expected from Hoist.

KEY FEATURES:

- Large drive axle, drive tires, and steer tires provide a wide footprint to distribute weight and support maximum capacity.
- A Cummins 6.7L, 164 HP diesel engine delivers maximum power and efficiency to your indoor application.
- The durable and reliable Dana 32000 transmission rounds out an expertly engineered drive train.
- Pallet or coil-tapered forks and coil ram with integral and side-shifting options offer application specific solutions – all while ensuring maximum capacity.
- Easy-access panels on both sides and in the cab floor simplify diagnostics and maintenance.
- DEF and diesel fuel fill points are located outside the forklift for quick refueling.
- MD3 digital display provides real-time diagnostics, enhance programmability, and key operational information.
- Advanced ergonomics provide a comfortable driving experience for operators with air ride seat, non-slip steps, and assist grips on both sides for entry and exit.

Since 1918, Hoist has built trucks to help keep the American supply chain moving. With parts of all major components sourced from America's leading manufacturers, you can count on Hoist's Made-in-America foundation to help meet all your heavy-duty material handling challenges.
