

MINI BALE WRAPPER

550 ATP

Selection of wrapping type: 2, 4 or 6 film overlays

Driven by PTO drive shaft

Universal three-point hitch

The mini bale wrapper is designed to be transported by small tractors. The Sitrex baler performs an essential wrapping task for small cylindrical bales of fodder, converting them into silage.

Its features **enable it to be attached to all types of tractors by means of a three-point hitch** and is driven by a PTO drive shaft. Bale wrapping is fully automatic and the operator has only to determine the desired type of wrapping (2/4/6 film overlaps) by initiating the operation using a start lever. When the job is finished, the machine stops automatically.

TECHNICAL DATA:

- **Weight of machine during operation:** 93 kg
- **Plastic film:** height 25 cm, length 1,800 m
- **Film stretch:** 50%
- **Wrapping (overlapping):** 6/4/2
- **Winding capacity:**
 - Bale height: 52 - 73 cm
 - Bale Ø: 50 - 60 cm
 - Bale weight: 40 - 50 kg
