

APS15 SERIES ALL-PURPOSE SEEDERS

25-130 HP | Cat. 1 & 2

The seeder that does it all.

The APS15 is at home in freshly prepared soil or overseeding existing turf. The front spike rollers break up the soil crust or penetrate the thatch to disturb the right amount of soil. The seed is dropped, protected from the wind by a shield, allowing it to drop to the ground where it is gently pressed into the soil by the notched or spiked rear roller. The initial seed-to-soil contact is essential to achieving a high germination rate.

The All-Purpose Seeder is ground driven with no driveline and related drivetrain components to maintain. By adjusting the front two rollers, you can control how aggressive you want to be in the area you are seeding or overseeding.

The many uses for the APS:

- Bare dirt seeding
- Turf overseeding
- Wildlife Conservation Seeding

Choose between a rear spiked roller or a 12" cast packer wheel roller.

Optional small seeds box.
