

BX *Sub-Compact Tractors*
BX1500

FEATURES

ROLL-OVER PROTECTIVE STRUCTURE (ROPS)

Roll-Over Protective Structure and retractable seatbelt are standard on the BX1500.

HYDROSTATIC POWER STEERING

A standard feature on all BX-Series models, fatigue-reducing power steering makes steering practically effortless.

HYDROSTATIC TRANSMISSION

When frequent changes in speed and direction are needed, HST responds with its smooth operating, single pedal control-which leaves your hands free for steering and implement control.

15HP ENGINE

Not just powerful, the 2-cylinder, liquid-cooled Kubota Z602 diesel engine runs smoother, quieter, and has cleaner emissions.

THICK FRAME

An extra-thick, full-length, welded-steel, ladder-stepped frame ensures the BX-Series of being exceptionally rugged and durable.

EASY OPEN HOOD

Our hood operation enables smooth, quick, one-touch opening of the hood. Furthermore, the design exposes more of the engine, enhancing maintenance and servicing.

BX *Sub-Compact Tractors* **BX1500**

FEATURES

OPERATOR PRESENCE CONTROL SYSTEM

The operator presence control will automatically turn off engine if the operator leaves the seat while tractor is in motion or the PTO is engaged.

PTO ENGAGEMENT

Selecting between mid, mid/rear, and rear PTO is a snap with the BX-Series hydraulic, live, independent PTO clutch—simply shift the lever and you're ready to work. No clutch design.

CATEGORY I, 3-POINT HITCH

Thanks to Kubota's standard 540 Hydraulic Independent PTO and CAT I, 3-point hitch, standard 3-point mount implements, such as our rotary tilter, can be easily attached and detached.

BAR OR TURF TIRES

Bar Tires provide for improved traction and are designed to produce minimum turf disturbance. Turf Tires tread is designed to minimize turf/grass disturbance.
