## L3200/L3800/L4600 (LA524/LA764)

# FRONT LOADER

### Single Lever Joystick

A single-lever joystick provides easy operation. A regenerative dump circuit allows for fast bucket dumping, and the hydraulic system provides for simultaneous operation of the boom and bucket.

### Quick Attaching/Detaching

Thanks to Kubota's innovative attaching/detaching system, you can attach and detach mounting pins and hose couplers from the driver's seat, quickly and easily. As a result, you can move from job to job with greater efficiency. Boom-mounted loader stands make access easy and allow the loader to stand alone when detached.

LA764

### Curved Grille Guard Design

The L4600's newly designed grille guard is curved to provide a wider field of vision and comes standard with the LA764.

LA524

### Straight Grille Guard Design

The L3200 and L3800's grille guard provides additional front-end protection and comes standard with the LA524.

### High-quality Cylinders

The LA524 and the LA764 Front Loaders feature high-quality, heavy-duty cylinders to bring more muscle to your loader work. The durable plating offers impressive pressure resistance and achieves superior rust protection.

# FRONT LOADER

### Standard 2-lever Quick Coupler\*

LA764's standard 2-lever quick coupler allows you to quickly and easily attach/detach attachments, all without the use of tools.

*\*Optional on LA524 (L3200/L3800)*

### Protected Hydraulic Lines

All of the hoses are routed in a recess under the loader lift arm for increased protection.

### Thick Steel Frames

The frame of the front loader maintains its sturdy, thick steel frame, but its design has been simplified by removing the braces.
