

MF 400

**New, modern styled, versatile tractors
from 46 to 130 hp**

MASSEY FERGUSON

The new MF 400 Series: Easy to operate, hard working tractors

The new Massey Ferguson 400 Series tractors combine proven engineering with modern design and ergonomics and are available in both two- and four-wheel drive versions. With easy access to serviceable items, uncomplicated electrics and traditionally designed transmissions, regular maintenance is speedy and simple.

Perkins engines

All models are powered by Perkins engines, renowned throughout the world for their power, reliability and economy. They range from 46 to 130 ISO hp in 3, 4 or 6 cylinder configurations with capacities from 2.5 to 6 litres. These low-revving, high torque engines are suitable for a wide variety of operations and are low in fuel consumption and long on working life.

Clearly laid out instrumentation

Proven transmission design

Depending on model, 8 speed manual or 12 speed synchromesh gearboxes are available. They are all of a well proven and robust design for reliable operation and ease of maintenance.

Ergonomically designed to increase productivity

The operator environment on the MF 400 Series tractors is a spacious, semi-platform design for ease of operation and driver comfort, producing higher productivity over longer periods.

The controls are simple to use and laid out so that they are easily accessible with instruments that clearly show all the necessary information such as oil pressure, engine temperature, air filter restriction, fuel level, and battery charge.

All models have a spring suspension seat which, with the exception of the MF 415, is mounted on a semi-platform seat deck. The foot controls have pendant pedals for further operator comfort.

Efficient linkage and hydraulics

The highly efficient Ferguson three-point linkage system is standard on all models, providing lift capacities of up to 3200 kg. With the exception of the MF 415 model, all also have independent auxiliary hydraulics producing flow rates of up to 50 litre/min.

Efficient Ferguson three point linkage

Ergonomically designed operator environment

Compact and manoeuvrable

The MF 415 to the MF 440 four-wheel drive models are especially compact as the axle is side drive which also gives the added benefit of improved ground clearance.

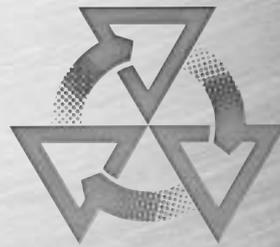

All four-wheel drive models have a maximum turning angle of 55° making a range of machines that are highly manoeuvrable.

An outstanding investment

These easy to operate and maintain tractors provide excellent performance at a competitive price. And with high re-sale values, they represent an outstanding, long term investment.

| Model | ISO hp (kW) | Perkins Engine | Capacity (litre) |
|--------|-------------|--------------------------|------------------|
| MF 415 | 46 (34.3) | AD3.152 3 cylinder | 2.5 |
| MF 425 | 65 (48.5) | A4.236 4 cylinder | 3.8 |
| MF 435 | 72 (53.7) | P4000 4 cylinder | 4.1 |
| MF 440 | 82 (61.1) | P4000 4 cylinder | 4.1 |
| MF 465 | 120 (89.5) | 1006.6 6 cylinder | 6.0 |
| MF 475 | 130 (96.9) | 1006.6T 6 cylinder turbo | 6.0 |

THREE POINT POWER

**Powerful engineering. Powerful products.
Powerful support.**

Point one reflects our heritage of innovation and engineering excellence.

Point two recognises the demand for superior products with more controllable power.

Point three is our solid commitment to support your tractor throughout its lifetime with personalised finance arrangements, professional service and guaranteed, readily available parts, all delivered by our world-renowned Dealer network.

Three Point Power - making these tractors as revolutionary as our original three point linkage.
